Laurie J. Loydall Web UI Developer

Experience

May 2023 - Present — ***Heal Security Inc, Menlo Park, CA***

Lead Front-end Developer

Heal Security Inc is a cybersecurity threat intelligence startup focusing on the healthcare industry. I've led the development of the front end for their platform (HEAL Security Desktop and HEAL Security Vitals) from nothing to v1, and have helped establish a zero hand-off devops environment for complete dev ownership of the SDLC.

- ***Typescript / React / Redux / Reselect / Tailwind / Vite / GraphQL / NodeJS / Postgres***
- ***Google Cloud Platform / Gitlab / Helmcharts / Docker / Kubernetes / Vitest / Playwright / Storybook***

September 2021 - October 2022 — ***Toca Social, London***

Front-end Developer

Toca Social is a penalty shootout, interactive football game. At Toca, I led a team to build the scheduling system front end. I also worked with Toca on their reception desk system and website booking journey.

- ***Typescript / React / Redux / Reselect / Thunk / XState / CSS modules***
- ***AWS / Webflow / Storyblok (headless CMS) / Testing-library / Jest / Storybook***

May 2021 - August 2021 — ***TradeNation.com, w/ The Value Engine, London***

Front-end Developer

Built a tool to demonstrate the principles of margin trading for a trading platform called TradeNation. The tool simulates margin trading for beginners, which features prominently on their website homepage.

- ***Framer-motion / React / Redux / Reselect / Thunk / CSS modules / Jest / Testing-library / Storybook***

Aug 2019 - May 2020 — ***Wunderman Thompson, Watford***

Full-stack / Front-end Developer

Front-end development of e-commerce checkout journeys and a generic react component library which was consumed by various client UIs in a Scrum / Agile workplace.

- ***Various JS/CSS Libraries incl. React / Redux / Next.js / Thunk / Sass / Jest / Enzyme / Storybook***

Nov 2018 - Aug 2019 — ***Lloyds Banking Group, London***

Full-stack / Front-end Developer

Front-end development in the Commercial On-boarding lab. Delivering components for the Commercial On-boarding web front end and Product Origination portal. Using Node, created a database adapter for document upload / update portal.

- ***Various JS/CSS Libraries incl. React / Redux / Redux-saga / Sass***
- ***Jest / Enzyme, build tools such as Webpack and Babel / Node JS / Express / Loopback ORM / GraphQL***

Dec 2014 - Nov 2018 — ***Cloudfm Group, London***

Senior Full-stack Developer

Full-stack development of facilities management software. Built a system (SERN stack) which is a gateway for clients to log and track FM jobs and track expenditure on FM. Delivered iterations of the Cloudfm engineer's app.

- ***Various JS/CSS Libraries incl. React / Mobx / BackboneJS / jQuery / Bootstrap /Sass***
- ***Node JS / Express / SQL Server / NGINX / Mongo DB / Bookshelfjs ORM / HTML5 / CSS3 / Cordova***

2011 - 2014 — ***Various***

Graphic Designer/Web Developer.

Education

2008-2011 — ***University of Gloscestershire, Cheltenham***
